

MIRROR CUT® is the revolution in knife sharpening technology

- ✓ Wet Linish process = No Heat
= No Chipping or Cracking.
- ✓ Less Friction makes for Easier Cutting
- ✓ Superior Edge with remarkable Cutting Edge Retention.
- ✓ Less 'Steeling'
- ✓ Easier Cleaning
- ✓ Minimal Metal Removal =
More Life from your Knife.
- ✓ Less Sharpening = \$\$\$ Savings

MR KNIFE is an ACCREDITED MIRRORCUT OPERATOR
Used under licence from FLAMIN SHARP PTY LTD
MIRRORCUT IS A REGISTERED TRADEMARK OF
FLAMIN SHARP PTY LTD

Flamin' Sharp has taken sharpening to the next level and has delivered 21st century technology to a stone age problem.

Knife manufacturing technology has come a long way in the last 30 years but unfortunately, up until the advent of MIRROR CUT® knife sharpening methods have not kept pace with these major changes. The Dry Grinding processes used by most sharpening providers today are the same as they were over 30 years ago and were the normal practice which was not such a problem with the old carbon steel knives with the wooden handles. Modern Knives are very susceptible to the Heat Related damage caused by these archaic methods. Modern Stainless Alloy knives require a totally different approach regards sharpening.

Flamin' Sharp recognised this problem and developed a process that has become the new bench mark for modern sharpening with MIRROR CUT®, which has brought Knife Sharpening into the 21st century.

Testing by Independent Engineers revealed that there are no adverse effects of heat related damage to our MIRROR CUT® edge compared to knives sourced and tested from our competitors.

Flamin' Sharp also commissioned a series of photographs magnified 500 times, of a 5mm section of blade which clearly shows that the MIRROR CUT® edge has no visible 'Feather Edges' compared to our competitors with their edge clearly showing the effects of Dry Grinding with Scoring, Galling and the cutting edge resembling a wood saw.

**BLUNT KNIVES ARE DANGEROUS,
GET THEM SHARPENED BY**

MOBILE SHARPENING
